

## **IN THE ABSTRACT:**

Please rewrite the Abstract of the Disclosure as follows:

~~There is provided a system and~~ A method for ~~deploying~~ deploys a set of coupled data transformation modules describing a data transformation, the data transformation for transforming a data structure from a first format to a second format, ~~the~~. The method ~~including~~ includes ~~the steps of~~ receiving an instruction for selecting the set of transformation modules from a memory; converting each of the set of transformation modules to a common model format, the set of modules having at least one transformation module being of a module type of a type set including language constructed modules and visually constructed modules; and generating an executable version of the converted transformation modules suitable for execution by a data transformation engine; ~~wherein the~~. The executable version, when executed, transforms the data structure from the first format to the second format.
